

Search Guard Enterprise Integrations

Jochen Kressin · 2018-05-20

Starting our journey end of 2013, Search Guard has been around for quite a while now. It is integrated in and compatible with many enterprise grade software solutions. In this short article we want to share with you a small selection of those integrations.

Red Hat OpenShift Logging Stack

Search Guard is integrated in the [Red Hat® OpenShift logging stack](#) via the [OpenShift Elasticsearch plugin](#) and provides role-based, index-level access control. OpenShift is a container application platform that brings docker and Kubernetes to the enterprise. OpenShift includes Kubernetes for container orchestration and management.

Pivotal Cloud Foundry

[Pivotal Cloud Foundry](#) is a cloud-native platform for deploying and operating modern applications. [The Altoros Elasticsearch for PCF tile](#) comes with the Search Guard plugin that enables user authentication, authorisation, and encryption when accessing Elasticsearch.

IBM Spectrum Conductor with Spark

[IBM® Spectrum Conductor with Spark](#) enables you to deploy Apache Spark efficiently and effectively, supporting multiple versions and instances of Spark and a broad set of born-in-the-cloud application frameworks. [Search Guard provides TLS encryption for Elasticsearch](#) on HTTP and transport layer.

CA Jarvis

Jarvis the a data analytics platform from CA Technologies . [CA Jarvis](#) enables customers to gain real-time visibility and insights by seamlessly applying the latest data science and machine learning techniques to large, diverse data sets. [Search Guard provides TLS encryption for Elasticsearch](#) on HTTP and transport layer.

Siren.io

[Siren](#) is an investigative intelligence platform delivering a unique investigative experience to solve real world data driven problems. It provides instant, real-time cross stream intelligence, and can be layered over your existing sophisticated Big Data Infrastructure and multiple data sources. Search Guard provides [encryption and role-based access control for the Siren platform](#)

SIEMonster

[SIEMonster](#) is an Enterprise-grade Security Information and Event Management (SIEM), built on scalable, open source components. It provides SIEM products for Managed Security Providers (MSSP's) and Security Professionals around the world. [Search Guard is embedded into SIEMonster's product suite](#) and provides defense-grade security.

Deflect by equalit.ie

[Deflect](#) is a robust and innovative website protection service designed to withstand distributed denial of service (DDoS) attacks. It provides DDoS-mitigation service for NGOs, civil society groups, activist bloggers and independent media. [Search Guard provides encryption and access control for Deflect.](#)
